PROFILE SUMMARY

Site Reliability Engineer with 2 years of hands-on experience designing, maintaining, and optimizing production systems in cloud-native environments. Proven ability to lead incident management, root cause analysis, observability, and automation initiatives that measurably improve system reliability and reduce operational toil. Provides L2/L3 production support with 24x7 rotational on-call coverage, and is experienced in SLO-driven operations, error budget management, and proactive alerting, with a strong emphasis on cross-functional collaboration across development, DevOps, and production support teams. Consistently delivers continuous improvement through structured post-incident reviews, runbook documentation, and reliability-focused engineering practices that ensure resilient, high-availability services at scale.

TECHNICAL SKILLS

Reliability Engineering:	Incident Management, RCA, Failure Analysis, SLO/SLA, Error Budgets, High Availability, MTTR, On-Call Operations, Disaster Recovery, Capacity Planning
Production Support:	L2/L3 Support, 24x7 Rotational On-Call, SLA Adherence & Reporting
Observability Tools:	Datadog, AWS CloudWatch, ELK Stack, Alert Optimization, Dashboarding
Cloud Platforms:	AWS (EC2, S3, VPC, EKS, CloudWatch, Lambda, ECR, IAM, Route 53, ALB, Auto Scaling, SSM, Secrets Manager)
Deployment Strategies:	Blue/Green Deployment, Canary Deployment
Containers & Orchestration:	Docker, Kubernetes
CI/CD & Automation:	Jenkins, GitHub Actions
Infrastructure as Code:	Terraform
Database:	MySQL (Query Optimization, Performance Tuning)
Scripting Languages:	Python, Linux, Bash
Incident & Collaboration Tools:	Jira, Confluence, ServiceNow

EXPERIENCE

Site Reliability Engineer — TCS (Tata Consultancy Services)

June 2024 – Present

Client: LSEG (London Stock Exchange Group) | Bangalore, India

- Analyzed recurring production incidents and contributed to a 20% reduction in repeat issues by identifying root causes and implementing systematic preventive fixes.
- Enhanced Datadog dashboards and alert configurations, reducing alert noise by 30% and significantly improving mean investigation time during incidents.
- Built Python/Bash automation scripts for routine health checks and log analysis, eliminating ~1 hour/day of manual effort and reducing incident response time by 35%.
- Supported infrastructure deployments using Terraform and Kubernetes, enabling stable and repeatable release processes across environments.
- Participated in on-call rotations handling P1/P2 incidents, contributing to MTTR reduction through structured escalation and triage.
- Contributed to the full incident lifecycle: detection, escalation, mitigation, and post-incident review, ensuring comprehensive root cause analysis with clear prevention steps.
- Drove SLO-based monitoring improvements by aligning alerting thresholds with defined reliability targets and error budget policies, supporting active SLA adherence tracking and reporting.
- Documented detailed RCA reports for customer and internal stakeholders, improving transparency and organizational learning.
- Collaborated with development and operations teams using Jira and Confluence to track reliability initiatives and maintain runbooks.

- Collaborated with DevOps teams on release management, environment configuration, and system reliability improvements.

ACADEMIC PROJECTS

Cloud-Based Music Streaming Application

2022 – 2023

Kalasalingam University | Cloud Infrastructure

- Architected and deployed a cloud-based music streaming application on AWS using a fully automated CI/CD pipeline (Jenkins + GitHub Actions), reducing manual deployment steps.
- Implemented end-to-end monitoring and centralized logging using AWS CloudWatch, enabling real-time visibility into application health and performance.
- Improved deployment reliability and failure recovery by introducing rollback mechanisms and health checks within the deployment pipeline.

EDUCATION

B.Tech in Electronics and Communication Engineering

2019 – 2023

Kalasalingam University

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- AWS Cloud Practitioner Essentials
- Docker Fundamentals — Coursera
- Kubernetes — TCS Learning Platform
